

SYSTEM FAMATO

THE HOME OF THE RURAL FAMILY

Union System

Our System

It is the system that defends, works for, and speaks on behalf of all rural producers in Brazil.

It is structured in a pyramidal form:

Rural Representation

The rural producers' needs move through every level of the **Rural Union System**, transforming challenges from the field into strategic actions that strengthen agribusiness across the entire country.

System Homes

We're always present in discussions on topics that impact agribusiness. We represent the interests of rural producers at both regional and national levels.

We deliver courses, training, and Technical and Farm Management Assistance to improve production results. We also bring community outreach program, education, quality of life, and well-being initiatives to value those who live and work in the field.

We produce strategic agribusiness information. We conduct socio-economic and environmental studies and projects that support decision-making processes.

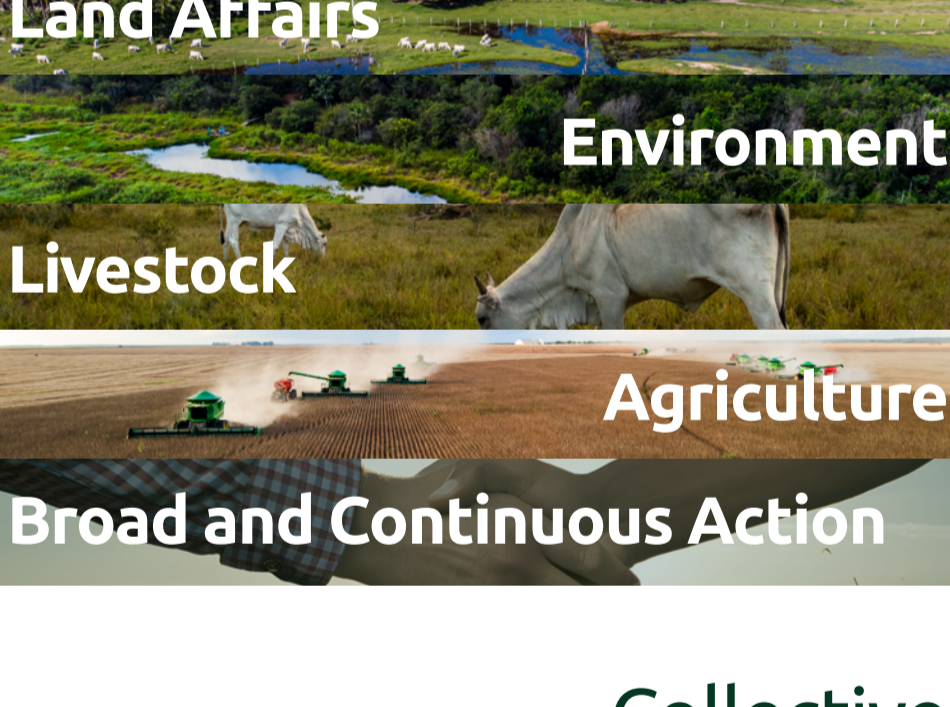

A collaborative structure that identifies producers' challenges in agriculture and livestock. We connect agribusiness with technological solutions, contributing to its economic, environmental, and social sustainability.

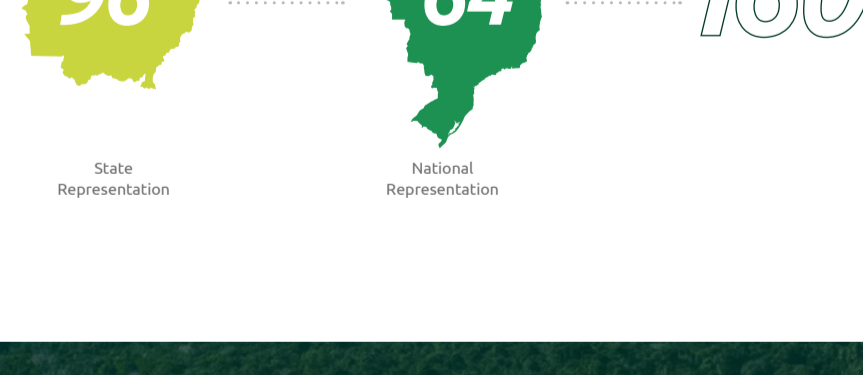

There are 95 unions across Mato Grosso, present in municipalities to listen to producers' needs and provide guidance.

Ongoing Representation

Collective Strength

Participation in councils and committees ensures the voice and presence of the Rural Union System in decisions that impact agribusiness.

We are over **33,000** Rural producers.

AN ECOSYSTEM OF AGRO SOLUTIONS.
